

What is claimed is:

1. An accessory bracket comprising:
an arm;
a mount connected to the arm; and
a clamp section wherein the mount and the clamp section form a generally cylindrical opening securable to a structure on a vehicle.
2. The accessory bracket of claim 1 wherein the opening is adjustably securable to the vehicle.
3. The accessory bracket of claim 1 further including an accessory securable to the arm.
4. The accessory bracket of claim 3 wherein the arm includes a post extending from the arm for adjustably securing the accessory thereto.
5. The accessory bracket of claim 4 wherein the accessory includes a mirror for providing the operator with rearward and rear lateral views.
6. The accessory bracket of claim 4 wherein the post and the arm are formed integral.
7. The accessory bracket of claim 1 wherein the vehicle is a boat.
8. The accessory bracket of claim 7 wherein the accessory bracket mounts to a tower on the boat.

9. The accessory bracket of claim 3 wherein the accessory bracket is adjustable to adjust the position of the accessory relative to lines of sight of an operator.

10. The accessory bracket of claim 3 wherein the arm includes a hinge for raising or lowering a portion of the arm for adjusting the height at which the accessory is secured.

11. The accessory bracket of claim 3 further comprising an accessory clamp for adjustably securing the accessory to the arm.

12. The accessory bracket of claim 11 wherein the accessory clamp may rotationally secure to the arm.

13. The accessory bracket of claim 11 wherein the accessory clamp may pivotally secure to the arm.

14. The accessory bracket of claim 11 wherein the arm includes a cylindrical portion to which the accessory clamp is secured.

15. The accessory bracket of claim 1 further including a set screw for securing the arm to the vehicle.

16. The accessory bracket of claim 15 wherein the clamp section includes the set screw for securing the arm to the vehicle.

17. The accessory bracket of claim 3 wherein the accessory is selected from the group comprising a mirror assembly, a light, a radar apparatus, an operational indicator, an informational instrument, and an antennae.

15. An accessory bracket comprising:
an arm including:
 - an accessory end for adjustably securing an accessory thereto and above the lines of sight of an operator of the vehicle, and
 - a mounting end; and
 - a mount connected to the mounting end of the arm for adjustably connecting the accessory bracket to a structure on a boat wherein the arm is arcuate to position the accessory.
16. The accessory bracket of claim 15 wherein the mounting end of the arm is mounted to the vehicle in a position aft of the position of the accessory end of the arm.
17. An accessory bracket comprising:
an arm for adjustably securing an accessory thereto;
a mount integral with the arm for adjustably connecting the accessory bracket to a structure on a boat; and
a cylindrical opening formed at least in part by the mount for securing to the structure of the boat wherein the accessory bracket may be mounted to a cylindrical structure on the vehicle.
18. The accessory bracket of claim 17 wherein the vehicle is a boat.
19. The accessory bracket of claim 18 wherein the cylindrical structure is a tower.
20. The accessory bracket of claim 17 wherein the accessory may be mounted above the lines of sight of an operator of the vehicle.

21. The accessory bracket of claim 20 wherein the accessory includes a mirror.
